Deep Innovation: GuestQuest Deployment Dossier

Vision & Value Proposition

GuestQuest transforms event recruitment from a manual 'spray and pray' effort into a precision-engineered growth engine. It shifts the focus from filling seats to curate the exact room needed for strategic success.

Deeper engagement: Personalized outreach ensures attendees feel specifically chosen, increasing active participation.

Measurable outcomes: Direct tracking of outreach-to-RSVP ratios provides hard data for budget justification.

Format differentiation: High-density quality (e.g., 500 Scaleup GCs) turns a standard event into a must-attend industry landmark.

Sponsor value: Guarantees sponsors access to their specific Ideal Customer Profile (ICP), moving beyond generic branding.

Persistent data: Captures prospect intent and interaction data that informs sales strategies long after the event ends.

Scalability: Equally effective for a 20-person executive dinner or a 5,000-attendee flagship conference.

Attendee & Stakeholder Impact

The High-Value Prospect (e.g., General Counsel): Busy executive overwhelmed by generic invites. They need an 'at-a-glance' reason to attend that feels tailored to their specific career challenges. 'I usually ignore these, but this invite mentioned my specific industry hurdle and showed me exactly who else in my circle was going.'

The Event Producer: Accountable for NPS and room quality. They need to hit capacity without spending hundreds of hours on manual LinkedIn sourcing and follow-up emails. 'GuestQuest handled the entire outreach funnel, allowing my team to focus on the onsite experience rather than chasing RSVPs.'

The Sponsorship Manager (Non-obvious): Responsible for proving ROI to high-paying partners. They need a guaranteed room of decision-makers to secure repeat bookings. 'Being able to tell a sponsor we have exactly 45 vetted CTOs confirmed via AI-profiling made the partnership an easy sell.'

Feasibility Assessment

A. Technology Readiness Level: TRL 6. The TRL scale (1-9) tells us how close a technology is to being reliably used in the real world. GuestQuest sits at 6 because while AI outreach and ICP profiling are proven in sales tech, integrating them into a seamless event-specific workflow with real-time RSVP sync requires validation.

B. Operational Readiness Level: BRL 4. The BRL scale (1-9) measures how ready an innovation is for real-world deployment. GuestQuest is at 4, having a defined concept and clear market need, but requiring live event stress-testing.

Setup complexity: Designed for non-technical teams; operates as a 'set and forget' layer over existing CRM data.

Reliability: Failure modes (like incorrect profiling) are mitigated by human-in-the-loop verification steps before outreach goes live.

Integration: Built to connect with Cvent, Eventbrite, and LinkedIn via API.

Data Privacy: Requires robust GDPR/CCPA compliance for automated outreach and data scraping.

Cost model: Tiered pricing based on the number of successful 'net new' attendee conversions.

Prototyping & Pilot Roadmap

Phase 1 - MVP: Run a test for a small VIP dinner (20-30 pax). Use AI to source and invite 100 prospects to hit capacity. Measure conversion and time saved.

Phase 2 - Controlled Pilot: Deploy at a mid-sized industry workshop. Stress-test multi-channel outreach (Email + LinkedIn) and automated briefing delivery.

Phase 3 - Business Model Validation: Refine the ICP profiling engine. Determine if the primary value is the software itself or the 'guaranteed attendee' service model.

Phase 4 - Scale: Full integration with major event tech platforms and development of an implementation playbook for global event teams.

Strategic Launch & Market Integration

Strategic Partnerships: Partner with speaker bureaus to offer GuestQuest as a 'room-filler' value-add for high-profile keynotes.

Rollout Strategy: Launch with a high-profile case study showing a 30% increase in 'C-suite' attendance for a recognizable tech brand.

Macrotrend Alignment: Addresses the shift from 'broadcast' events to 'curated intelligence' where the quality of the network is the primary product.

Next Step: Within 30 days, identify one upcoming niche session and run a 'GuestQuest Pilot' on 50 'net new' prospects to validate conversion rates.
